FCR PRIMA II

Compact CR system. Imaging quality without compromise

FUJIFILM

Digital imaging made simple by Fuji

The compact Fuji Prima II is one of the most popular CR systems in the veterinary market today with hundreds in daily use throughout the UK.

Fitting neatly into the smallest of surgeries, the Fuji Prima II has features and reliability that only Fuji, as the originators of computed radiography, can offer.

- The UK's most popular CR system from Fuji
- On screen image in less than 20 seconds
- Processing capacity up to 73 imaging plates/hr
- Superior Fuji image quality and reliability
- Easy integration into your PACS and practice management systems
- Simple to use fully featured veterinary specific software
- Imaging plate sizes from 18x24cm, 24x30cm and 35x43cm as well as flexible intra oral
- Use with your current x-ray generator

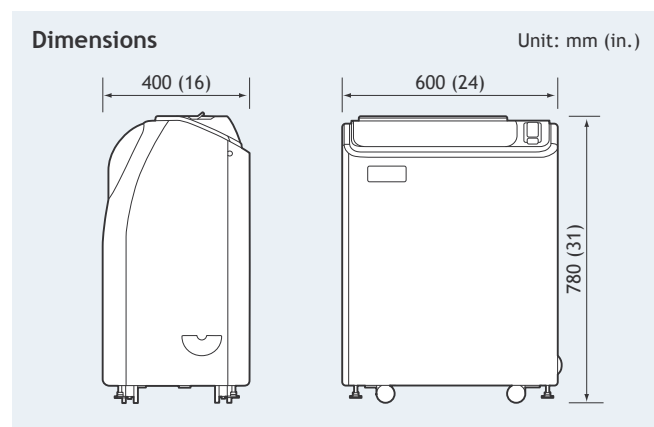

Our standard Fuji Prima II package includes absolutely everything you need in a digital imaging system, from delivery and installation through to training and a comprehensive 12 month warranty. We even include the first year's service

Ongoing support is provided by our own team of Fuji trained in-house engineers.

For your own in surgery demonstration of what Prima II can do for you, just contact us on 01844 344 911
