THE BEST SELLING EQUINE
DR SYSTEM IN HISTORY

NEXT II

THE BEST SELLING EQUINE DR SYSTEM IN HISTORY

NEXT Equine DR II contains everything you need in a portable DR system. The industry first monitor elevation system enables and enhances image review and communication with clients while standing, improving client communication and diagnostic confidence when making tough decisions in the field. Featuring an all-new rugged 14" tablet workstation that's designed to acquire images in even the harshest conditions, as well as an improved, stronger hard-side carrying case.

NEXT Equine DR II - THE BEST JUST GOT BETTER!

Rugged 14" Touchscreen Workstation

The SOUND 14" Rugged Tablet - reliable, safe environment use, consistent performance:

- IP65 rated for water and dust resistance
- Military Specification for shock, vibration, EMI and EMC
- 2 Hot-swappable batteries up to 6 hours of continuous use
- Sunlight Readable HD Display
- 1TB SSD with Windows 10 Embedded OS
- Intel 8th Gen i5 Quad Core Processor - high performance, low power use

2 Hot-swappable batteries.

SOUND Smart DR® Software

Work Flow Optimized

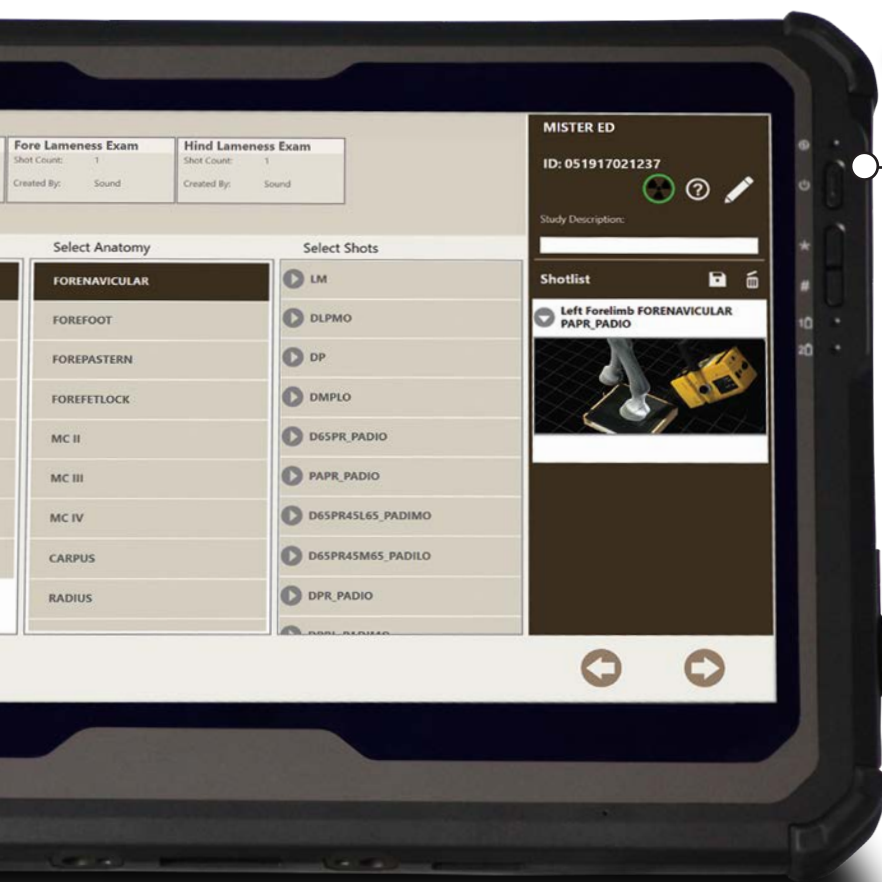

Three steps or less to acquisition with an intuitive interface and easily customized protocols to streamline shot-list creation.

On-Board Training & Support

On-board help videos enable new users to be trained on imaging in minutes. On-system live chat with trained technicians delivers fast access to help when it's needed most.

3D Position Assistant

Proper positioning reference at the finger-tips for common to not so common views. Get the image you want the first time.

Monitor Elevation System

- Adjustable height to enable stand-up use
- Industry first technology
- Your workflow, your choice

MUSICA Intelligent Image Processing

MUSICA knows how to automatically tune for any patient, species, or size, delivering consistently high image quality.

- Balanced presentation of soft tissue and overlapping bone structures
- Realistic representation of anatomy, not over processed
- Gold standard in veterinary radiology

Multiple Panel Options

10"x12" or 14"x17" cesium wireless auto-sense panel options.

SOUND's equine handle system allows for custom handle placement, up to 3 sides.
