

SoundSafe™

The Original and Largest Veterinary Image Cloud Since 2000

Responsible Image Storage Options Aligned for Your Practice and Budget

SoundSafe™ Cloud

- Secure cloud based image storage and access
- Remote viewing – anywhere, anytime, any device.
- Redundant backup of images and database
- Leverages and extends the life of current infrastructure

What is the Cloud?

The “Cloud” is a marketing term indicating off-site infrastructure (servers and software), whether it be image storage, document storage or computing power. The fact is, not *all* clouds are created equal. At Sound-Eklin®, we understand the critical importance of maximum uptime, speed and reliability in your veterinary practice.

This is why we have partnered with AT&T® and access our cloud through a Tier 1 connection. The AT&T® Internet Data Center (IDC) has backup power, solutions for fire and HVAC, secondary backup systems and redundancy; as well as a team of on-site IT experts to make sure your images are safe and secure.

SoundSafe™ Cloud

Images Stored	300+ million
Images Transmitted Daily	70,000
Storage Clients	8,000

SoundBank™

- Cost effective local image archiving, viewing and sharing
- Intelligent delivery of images from the fastest source; local or cloud
- Immediate access to images

“Image data is one of the most important assets of any practice and deserves the highest priority.”

– W. HORNOF, DVM, DAVCR

Anywhere,
Anytime,
Any Device

Let's Come Down Out of the Clouds for a Minute...

Streamlined and uninterrupted workflow is a key consideration for any practice investment.

Even with robust infrastructure a hospital's cloud is only as good as the path to and from it. If the practice has slow upload speeds. Time can be increased in a busy practice when bandwidth is taxed with multiple demands, such as computers, credit card transactions and scheduling.

A Hospital's Cloud Is Only As Good As The Path To and From It

With all the benefits that cloud only concepts provide it's important to critically analyze the potential risks.

- Speed
- Responsibility
- Downtime
- Data Security

Have you looked at the fine print? Cloud providers offer little assistance getting images onto their cloud. Sound-Eklin's® Technical Support team is trained to assist practices with;

- Connection Issues
- Upload challenges
- Network Troubleshooting
- Remote Diagnostics

Benefits of Cloud + Local Image Access
Sound-Eklin's® SoundSafe™ and SoundBank™ image storage solutions offer the best of both worlds. Along with the fastest access to images in the practice, you have the convenience of remote viewing anywhere, anytime, on any device.
